

Hello Yarmouth Residents

July 30, 2021

This is Bruce Murphy, Dir of Health with a message on the Coronavirus.

The new Delta variant, is a new form of the original COVID-19 virus, and is far more contagious and spreads more easily.

The majority of cases are now from the Delta variant.

The Cape is now seeing a surge in cases

Yarmouth, currently has 30 active cases ranging from 9 months to age 88, with a positivity rate of 6.75 %

EVERYONE, vaccinated or not, can become infected and spread the Delta variant. People who have been vaccinated generally have mild symptoms or none at all, but could also have more serious symptoms depending on a weakened immune system or age.

The Yarmouth Board of Health, ADVISES everyone vaccinated or not, to WEAR A MASK when in public INDOORS.

As we enter this new phase of living with the virus, VACCINATION remains our strongest defense in preventing serious illness and hospitalization, while protecting yourself and your loved ones.

More people are now wearing mask and taking precautions, so please be considerate and respectful of others.
